Visit Note

Patient: Raymond Delgado DOB: 09/05/1980 MRN: 99213
Date: 02/11/2025
Provider: Tom Becker, PA-C NPI: 1144772233

CHIEF COMPLAINT: Right wrist injury after fall.

HISTORY: 44-year-old male slipped on ice in a parking lot approximately 3 hours ago, landing on his outstretched right hand. Immediate wrist pain and swelling. Denies head injury, numbness, or other complaints.

EXAM: Tenderness and swelling over the distal radius. Pain with wrist extension. Neurovascularly intact distally. Grip strength reduced by pain.

X-RAY (3 views): Non-displaced distal radius fracture, right wrist.

ASSESSMENT: Distal radius fracture, right (S52.501A); fall on ice (W00.0XXA).

PLAN: Volar splint applied. Ice, elevation, OTC analgesia. Referral to orthopedics within 5–7 days. Return precautions reviewed.
